

Biography

Deepak Dey is an experienced Pharma professional, diligent in his core functional area (pharmaceutical operations) and committed to the profession. In his 35 years (approx.) of service, before superannuating from Fresenius Kabi Oncology Limited in 2016, he has discharged executive as well as leadership responsibilities in the areas of research & development / technology transfer, pharmaceutical manufacturing, plant operations management, quality assurance, quality management, audits & compliance, and quality system automation.

He was instrumental in establishing and growing the oncology research and development services for Dabur Research Foundation. As section in-charge of the injectable development group of Dabur Research Foundation, in his 7 years tenure, he had developed several oncology products including Paclitaxel (credited being the first to develop Paclitaxel Injection in India) and transferred the technology of several other products like Cisplatin, Doxorubicin, Carboplatin, Methotrexate, Docetaxel, Etoposide, Cytarabine etc.

As site head of Dabur India Limited, he lead the mission to transform the quality mindset and culture at their Baddi manufacturing facility for meeting the exceptional quality requirements.

As Head of Quality Management in Fresenius Kabi Oncology Limited he had been instrumental in implementing Fresenius Global policies, procedures and systems at local organizations. The main quality process that had been handled was implementation of ISO 9001:2008 in Fresenius Kabi Oncology Limited, Gurgaon site in the role of Management Representative.

Multi-functional experience of working in different geographies and work cultures helped him further strengthen his technical as well as leadership skills and capabilities.

His main area of expertise is management of **Quality Compliant GxP Systems** for automation of quality processes. The approach followed had been the Risk-Based Approach as per the guidelines laid down in GAMP 5. The Life Cycle Approach as defined in the guide had been the basis of all implementation. This includes automation of Quality processes by implementing systems like SAP, Caliber LIMS, MetricStream QAMS, Trackwise QAMS, Ultimius Complaint Management System, Nichelon Training Management System, Audit Management System etc.

Deepak has worked with medium to large, well respected pharmaceutical products manufacturing and research organizations like Albert David Ltd., Ranbaxy Laboratories Ltd., Dabur Research Foundation, Dabur India Limited, Dabur Pharma Limited and Fresenius Kabi Oncology Limited. He is a postgraduate in Pharmaceutical Sciences and an active member of professional associations like PDA and IPA. In addition to being a Pharma-professional, he is also a regular speaker in industry & academia seminars/conferences and a trainer on the topics like pharmaceutical process, quality systems, GxP Quality Systems, 21 CFR Part 11, GAMP 5 etc.
